HA-FX1000

High grade in-ear canal headphones “Bi-METAL”

Bi-METAL
STRUCTURE

JVC

Package Design

Concept

World's first headphones with wood dome diaphragms for enhanced sound quality

Main Features

- Manufactured using JVC's advanced thin film processing technology, the wood dome diaphragms used in the HA-FX1000 reproduce natural sound
- Wood housing creates tonal characteristics similar to that of a musical instrument
- A high-specific gravity brass ring on a steel unit base forms the Bi-METAL structure which controls movement of the diaphragm
- One pair of memory foam and three sizes of silicone eartips ensure a comfortable and customised fit
- Supplied with a 2.62ft (0.8m) friction noise reduction cord and a 2.30ft (0.7m) extension cord
- Genuine leather carrying case included
- Gold-plated iPhone®-compatible plug

iPhone, iPod, iPod classic, iPod nano, iPod shuffle, and iPod touch are trademarks of Apple Inc., registered in the U.S. and other countries. iPad is a trademark of Apple Inc.

Full-size headphones with high-quality dynamic sound and optimum comfort

Main Features

- High-quality dynamic sound reproduction with 50mm Neodymium driver unit and two types of superior sound structure
- Ring port structure provides high-quality dynamic sound (please refer to page 37)
- Acoustic lens structure reproduces natural sound through two pieces of specially-engineered acoustic lenses
- Acoustic lenses (located in front of diaphragm) tune direct and indirect sound by subtly offsetting holes in each lens
- Wide head pad and soft ear pads for optimum comfort
- 11.48ft (3.5m) pure copper cord for minimisation of transmission loss with gold-plated plug
- 6.3mm plug adaptor included

Note

10 pcs / Master carton

● Availability : Current

With the newly developed “Ring port structure”, the high sound quality available from digital audio can be fully realised, from powerful bass to the subtle high frequencies.

RING PORT STRUCTURE

With a ring port structure's sound ports located in a circle behind the driver unit, the sound pressure in headphone housing is equalised, realising stable amplification in the unit as a whole.

SOUND-INSULATING EAR PADS

Provide excellent sound insulation along with a comfortable fit

OFC CORD

Minimises the transmission loss with pure copper wire

CARBON COMPOUND DIAPHRAGM

Provides natural sound and highly realistic sensation

Special technology for HA-NC250

JVC

Technology to block noise

Sound-insulating ear pads

Soft memory foam cushions with extremely smooth surface ear pads that fit exactly on your ears create a seal to block background noise.

Dual housing structure

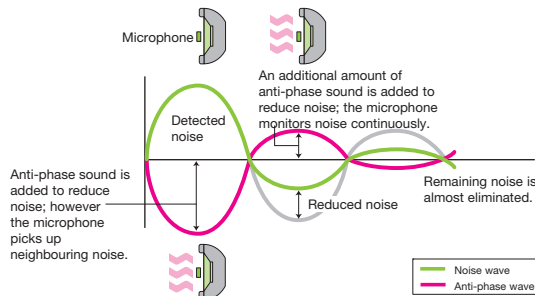

Dual acoustic wall blocks incoming background noise.

Technology to reduce noise

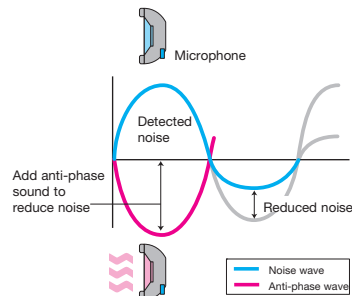

Equipped with advanced noise cancellation technology

Even after reducing background noise, some will remain. A microphone close to the driver unit picks up such remaining noise and the feedback circuit produces the appropriate amount of additional anti-phase sound. Every nuance of audio becomes clear through this feedback technology.

● Advanced noise cancelling with “feedback technology”

● Standard noise cancelling
