HD Memory Card Camera Recorder

GY-HC900

CONNECTED CAM™

The Ultimate Live-Over-IP

Product photo shown with optional equipment.

CONNECTED CAM™

The first model of JVC's CONNECTED CAM series, the GY-HC900 is a unique and innovative broadcast camcorder that makes no compromises in image quality while offering a level of connectivity not found elsewhere. It features three 2/3-inch CMOS image sensors that deliver high sensitivity, low noise and wide dynamic range, as well as IPX2 equivalent robust body for challenging scenes. It's equipped with a new powerful communications engine that truly makes News-over-IP a reality with a streamlined ENG workflow that's both reliable and cost-effective. The CONNECTED CAM expands complete IP-based solution, connecting the field with the studio.

Superb Camera Performance

2/3-inch 3CMOS Sensors with High Sensitivity of F12 (60Hz)/F13 (50Hz)

The GY-HC900 is equipped with three 2/3-inch 2.2 megapixel CMOS sensors, combined with an F1.4 prism to deliver full HD 1920 x 1080 images with excellent

sensitivity of F12 at 60Hz/F13 at 50Hz, a remarkable signal-to-noise ratio of 62dB, and a wide dynamic range.

New Image Processing Engine

JVC's first camera featuring a new communications engine that optimises both image processing and IP performance. The engine enables both recording and low latency streaming, as well as simultaneous decoding for return video and IFB.

50Mbps 4:2:2 10-bit Recording (H.264) and Standard MPEG-2 (35Mbps) Recording

The GY-HC900 is equipped with the H.264 Extreme-High Quality (XHQ) 50Mbps (MOV) 4:2:2 10-bit recording mode for virtually no block noise even when recording rapid action sequences. Also supported is MPEG-2 Long GOP recording up to 35Mbps; a widely used format by television broadcasters. With a variety of recording formats, the GY-HC900 provides professionals with unprecedented flexibility to meet production standards through a wide range of workflows.

Various Codecs and File Formats

	Mode (Bit rate)	Resolution	File format
MPEG-4 AVC/H.264	XHQ (50Mbps 4:2:2 10-bit)	1920 x 1080	MOV
		1280 x 720	
	XHQ (50Mbps)	1920 x 1080	
	UHQ (35Mbps)	1920 x 1080	
		1280 x 720	
	HQ (8Mbps)	720 x 480 (U model)	
		720 x 576 (E model)	
MPEG-2 Long GOP	Web HQ (3Mbps)	960 x 540	MOV/MXF
	Web LP (1.2Mbps)	480 x 270	
	HQ (35Mbps)	1920 x 1080	
		1440 x 1080	
		1280 x 720	
	SP (25Mbps)	1440 x 1080	

High-Speed Rec

MPEG-4 AVC/H.264	XHQ (50Mbps)	1920 x 1080	MOV
	UHQ (35Mbps)		

Industry-Standard B4 Lens Mount

With an industry-standard B4 lens mount, you can install a wide selection of existing B4 ENG lenses for a variety of shooting applications while saving cost.

Professional OLED Viewfinder

A professional 3.26" OLED viewfinder offers excellent visibility (GY-HC900CHE only), making focusing easy. Also present is a 3.5" LCD panel for menu navigation.

HDR via HLG/J-Log 1

The GY-HC900 is equipped with the HDR compatible HLG (Hybrid Log Gamma) mode and JVC's proprietary J-Log 1 Gamma mode. These enable high dynamic range capture of a broad spectrum with 10-bit recording for better

colour grading and to avoid banding. Footage recorded in HLG mode will deliver a full HDR image when viewed on HLG-compatible monitors. The J-Log 1 mode delivers wide latitude and a high dynamic range of 800%.

J-Log 1 and Rec709+Knee Gamma

Magnesium Alloy Body and IPX2 Equivalent Splash-Proof

Its robust body makes the GY-HC900 ready to work in harsh environments and situations. IPX2 equivalent splash-proof standard compliance enables image gathering in the field with confidence.

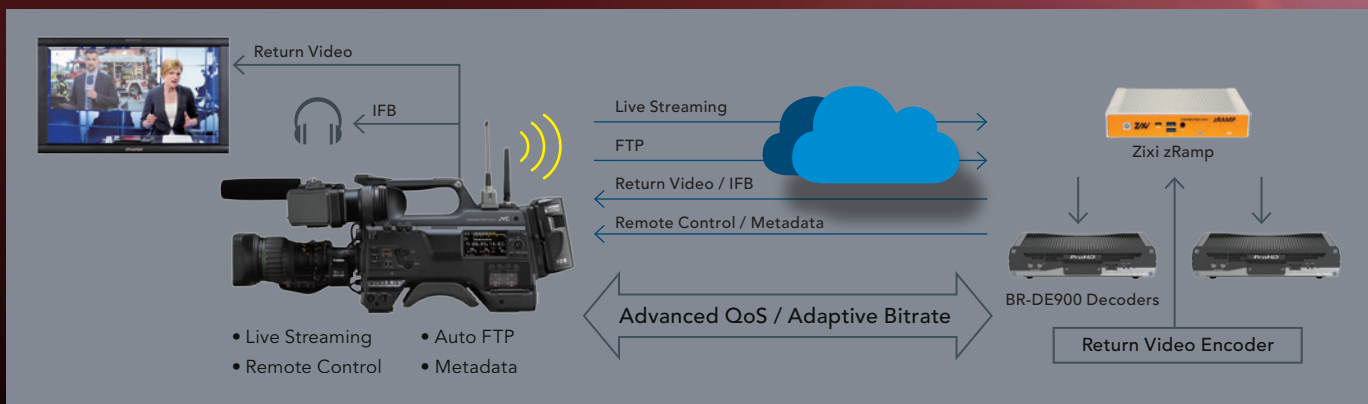

Connected to the Field. Delivering to the World.

ENG STUDIO

Product photo shown with optional equipment.

Live-over-IP Features

As the first in the CONNECTED CAM series, the GY-HC900 is a professional camcorder that delivers a variety of features and performance required in the field with IP

connectivity. Count on camera-to-studio and studio-to camera two-way data communication to enable you to build an advanced Live-over-IP workflow solution.

Live Streaming up to 20Mbps with Low Latency

The GY-HC900 is capable of streaming LIVE HD/SD and proxy video/audio files via network up to 20Mbps with low latency. High quality, stable streaming is possible from the field using just the camera itself*. No need to carry a heavy backpack or external boxes.

*With an appropriate network connection

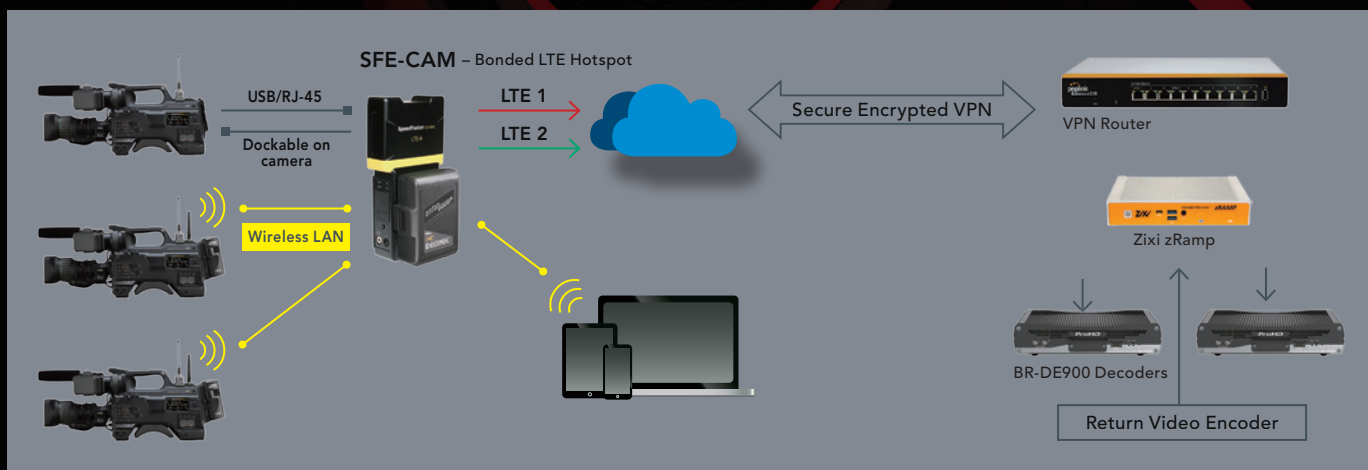

Return over IP for ENG

The GY-HC900 can receive return video/IFB from the station while streaming live to air via IP thanks to a new platform. This allows reporters and camera operators to wirelessly receive directions from the station .

Auto FTP

It's possible to upload video clips to an FTP server via IP. Auto upload function allows you to upload the recorded clip in background.

Connection in the Field

SFE-CAM is a powerful bonded cellular hotspot that docks directly to the GY-HC900 camcorder and features Peplink's patented SpeedFusion™ technology. Multiple GY-HC900 units can be connected to SFE-CAM via built-in Wireless LAN with dual external antennas. SFE-CAM bonds multiple cellular and Wireless LAN connections enabling the user to send digital video at greater speeds than you could with a single modem, and at a fraction of what it would

cost using a conventional satellite connection. And even while docked to a single camera, this unit provides the power and connectivity that lets you stream from multiple cameras to HD-SDI decoders or servers at a central location. It's provided with dual cellular modems with redundant SIM slots and dual band Wireless LAN letting you use up to four different providers for bandwidth bonding, data overage protection or eliminating blind spots.

GY-HC900RCHE studio camera

The GY-HC900 is an ideal choice for high-end EFP and studio fibre applications. It works with the FS-900 camera module, which attaches seamlessly to the back of the GY-HC900 via a 68-pin interface, and feeds 3G-SDI signals, control, audio, sync and intercom to a base station via fibre.

An integrated 3G-SDI pool feed input allows the GY-HC900 operator to capture video and stream it live simultaneously. Camera functions can also be controlled via web browser or the JVC RM-LP100 remote camera control.

The GY-HC900 is available in two variants, depending on whether the principal application is for studio or ENG use:

GY-HC900CHE

Designed for ENG applications, the GY-HC900CHE includes the VF-E900G viewfinder, built-in WiFi and GPS.

GY-HC900RCHE

The GY-HC900RCHE provides a cost-effective studio solution, ideal for use with a fibre interface and studio viewfinder. It does not include the EVF, built in WiFi or GPS.

Fibre Remote Studio System

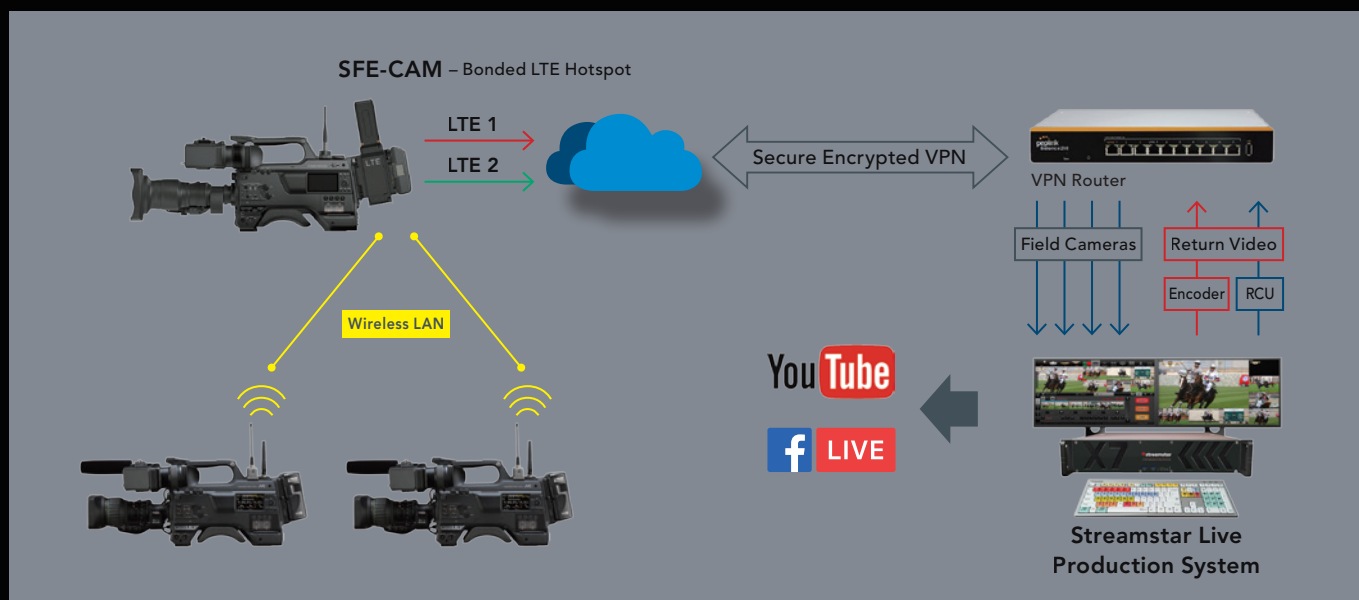

Product photo shown with optional equipment.

Connected to Excitement. Share it with the World.

LIVE EVENT PRODUCTION

Complete Video-over-IP Solution for Remote Production

The GY-HC900 camera, when paired with a live production system from Streamstar, provides an affordable multi-camera live production solution. Streamstar makes a range of live production and streaming studio systems, including advanced live production and streaming software, powerful stand-alone live production studio systems, versatile rack-mounted live production systems and dedicated real-time sports graphics servers. The systems accept video-over-IP streams from the GY-HC900, or any JVC IP-supported cameras.

Streamstar's live production systems support a variety of inputs and offer a full range of professional features, including replays and slo-mo on all channels, media playlists, amazing graphics capabilities, an internal character generator and an intuitive, touch screen user interface. Together with the GY-HC900 camcorder, you have an ideal live production system for a variety of markets – from news and sports broadcasts to live concerts and events – with direct streaming integration to Facebook Live and other CDNs.

Streaming Peer-to-Peer to Decoder or CDNs

The GY-HC900 supports various live streaming protocols to accommodate a range of usages.

UDP/RTP: Streaming to BR-DE900 or other decoder. For more reliable streaming supporting RTP/SMPTE 2022-1 with Forward Error Correction (FEC).

RTMP: Direct streaming to YouTube, Facebook Live or other CDNs.

Zixi: Streaming to Zixi, ProHD Broadcaster or Broadcaster on Cloud. Advanced QoS technology for reliable communication with Forward Error Correction (FEC), Auto Repeat Request (ARQ), and adaptive bit rate control.

■ High-Speed Recording for 1080p Slow Motion Playback

High-speed recording (1920x1080) at up to 120fps (59.94Hz)/100fps (50Hz) is available for smooth slow motion playback (up to 1/5 slow at 24p mode). An essential feature for smooth slow motion viewing of sports and live events.

■ 16-Axis Colour Matrix Adjustment

The GY-HC900 offers wide-range 16-Axis Colour Matrix adjustability. This enables fine adjustment over a wide spectrum including subtle skin tones while recording and relaying video using multiple cameras.

■ INTEROP and Sports Exchange Format Support

Thanks to INTEROP and Sports Exchange Standard format support (in US market only), sports organizations can produce HD video with rich metadata that specifically addresses the workflow needs of sports production and video coaching applications.

■ 3G-SDI Pool Feed Input

An integrated 3G-SDI pool feed input allows the GY-HC900 operator to capture video and stream it live simultaneously.

■ Other features • Pre-Rec • Dual Rec

Usability and Connectivity

Equipped with a variety of interfaces, the GY-HC900 offers versatility while meeting the needs of professional applications.

1.

• SDHC/SDXC Card Slots • Card Slot Selector

Dual slots enable series recording, dual recording, and backup recording using two cards.

2.

• Mic In

XLR 5-pin for stereo audio input.

3.

• XLR Audio In (x2) • XLR Audio Out • SDI Out (x2) • SDI In • DC Out (12V) • DC In • Phone • Remote

SDI input with 3G-SDI pool feed capability for simultaneous recording and live streaming. Two XLR audio inputs are switchable between microphone (with phantom power support) and line input, plus stereo AUX inputs.

4.

• TC Out • TC In • Video Out • Genlock

Equipped with genlock input and timecode in/out terminals, the GY-HC900 can be easily integrated into multi-camera setups.

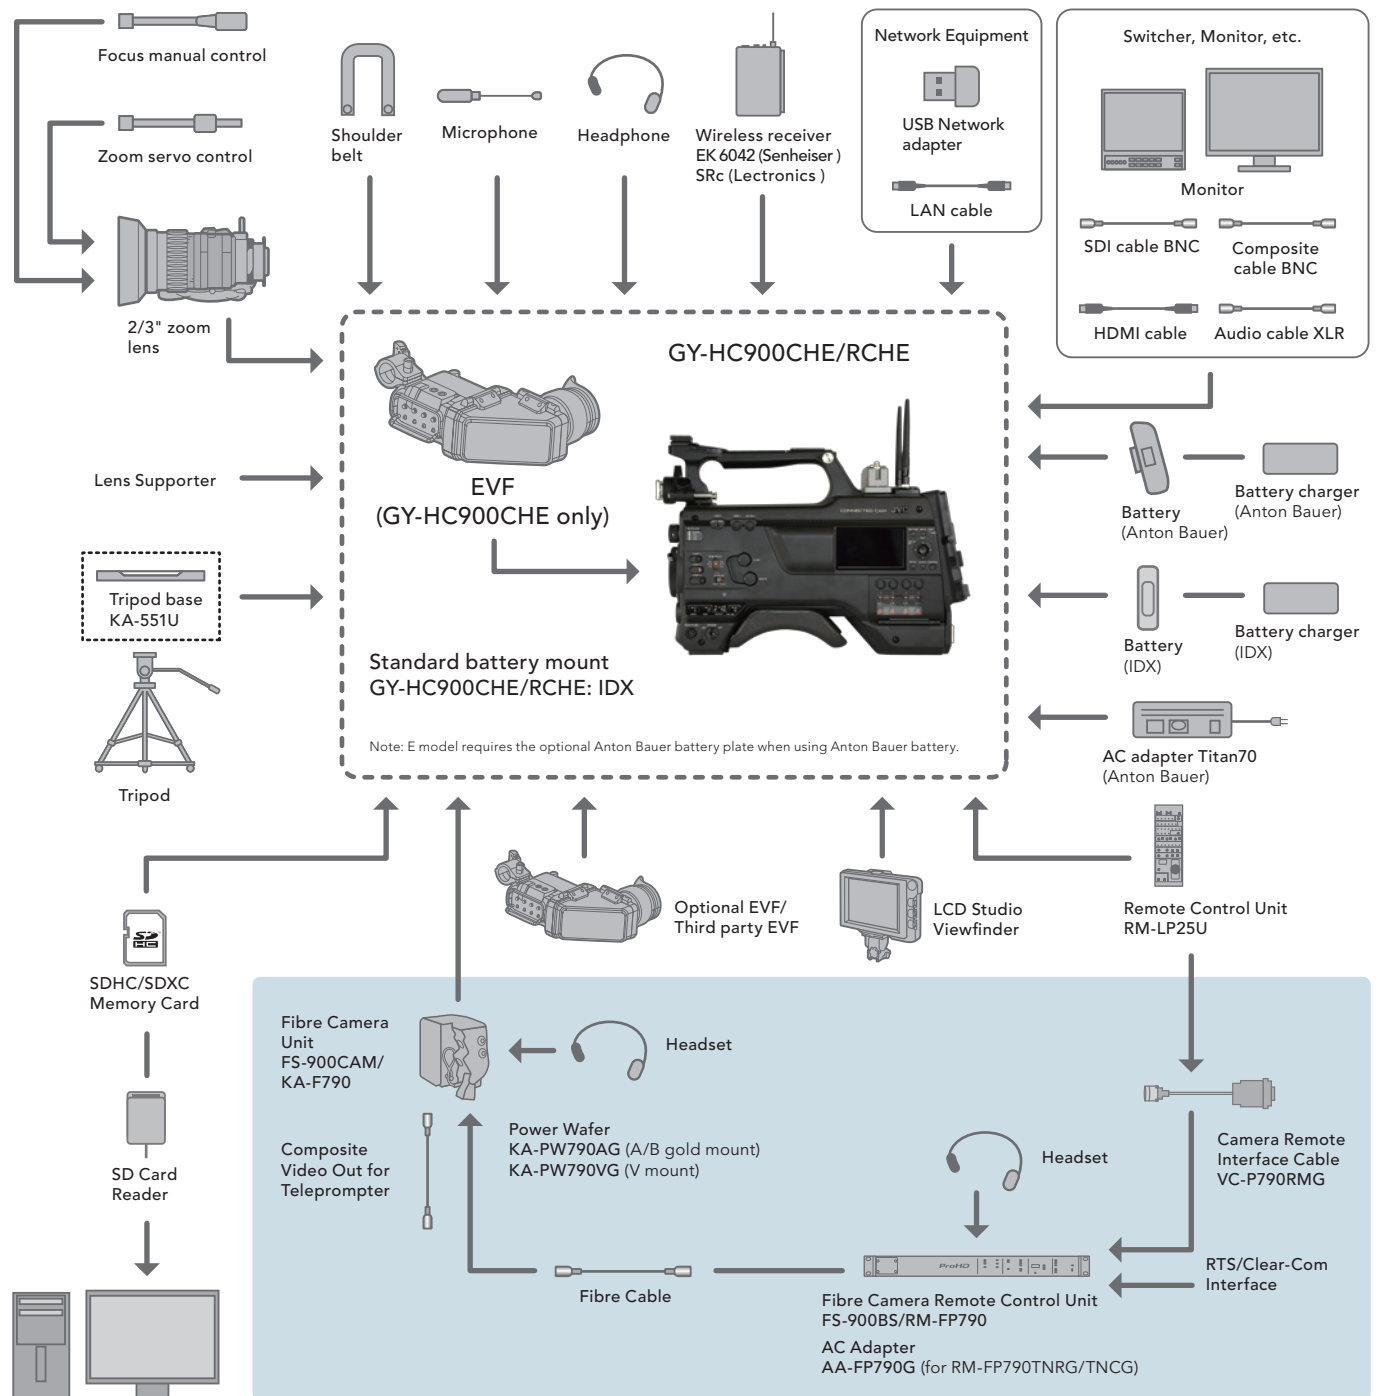

5.

• USB Host (USB3.0) • LAN (RJ-45) • HDMI • DC Out (12V)

Various IP connections available via RJ-45 (Wired LAN) and Host USB (3.0). DC out for power supply to peripheral equipment.
